## EDUCATION

College of Staten Island (CSI) – **3.93 GPA**

*Bachelor of Science in Computer Science*

Staten Island, New York

*August 2017- Dec 2020*

**Relevant Courses:** Data Structures, Object Oriented Programming, Assembly Language, Operating Systems, Advanced Web Development, Databases, Discrete Math, Algorithms, Artificial Intelligence, Machine Learning, Calculus 1-3, Switching and Automation Theory

---

## SKILLS

**Languages:** C++, C#

JavaScript, HTML, CSS,  
SQL, Perl, PHP, MATLAB,  
Python

**Tools/Software:** Adobe Suite,  
Microsoft Office, Tableau,  
Alteryx, Git

**Operating Systems:**  
Mac OS, Unix/Linux,  
Windows

---

## WORK EXPERIENCE

### COMPUTER SCIENCE LAB TUTOR, CSI

Staten Island, NY - *October – Present 2019*

- Worked closely with students by tutoring in the intro to Computer Science course
- Successfully analyzed and debugged code (C++) written by students to help solve problems
- Assisted professor in promoting productivity and learning while coding

### SOFTWARE ENGINEERING INTERN, UBS

Weehawken, NJ - *June – August 2019*

- Developed scripts utilizing **Perl** and **SQL** languages that automated report generation of trade data from the Martini repo trading application
- Applied SonarQube static code analyzer to the Martini application codebase for review of existing bugs and vulnerabilities in order to improve technical integrity
- Winner of 2019 UBS Intern Challenge – Created a pitch for possible future integration of existing legacy systems at UBS with Microsoft Azure services in collaboration with other Group Technology interns

### DESIGNER ASSISTANT, BELMAN MEDIA INC

New York, NY - *2016-2017*

- Assisted in creation of 10 storyboards and design for various media banner campaigns by utilizing **HTML, CSS, and JavaScript**
  - Data Analysis for consumer products to determine design specifications that will appeal to the customer market
  - Assisted in creating test cases for user acceptance testing to ensure successful project implementation
- 

## SELECTED PROJECTS

### IMAGE CLASSIFICATION RESEARCH PROJECT (Python)

*2019*

- Proposed and developed topologies for image recognition based on convolutional neural networks, along with building the learning strategies for these topologies.
- Evaluated the accuracy of classification (detection) results by using different approaches such as batch training, different activation and loss functions, augmentation, normalization, stand pooling and dropout.
- Performed experiments with medium and large size datasets, to plot and analyze the experimental results and make recommendations related to different applications and architectures.

### WISH DISH PROJECT (EmberJS)

*2019*

- Created an application utilizing the Yelp, and Google Maps API along with Ember Firebase to allow a user to search for businesses based off inputted criteria
  - Details page presents several details about the business, along with the exact location displayed in a Google Map
  - Ability to log into a Google Account to provide the User with the ability to save businesses within Ember Firebase to then be displayed within a Favorites page.
- 

## AWARDS

- Dean's List at the College of Staten Island (2017-2019)
  - National Grid Scholarship for outstanding Academics (2018)
- 

## INTERESTS & ACTIVITIES

- Lacrosse, Baseball, Basketball, Football, Snowboarding
- Proficient in Russian Language
- UBS Hackathon 2019
- CSI Computer Science Club
