## **EDUCATION**

College of Staten Island (CSI) – 3.94 GPA

Bachelor of Science in Computer Science

Staten Island, New York August 2017- Dec 2020

**Relevant Courses**: Data Structures, Object Oriented Programming, Assembly Language, Operating Systems, Calculus 1-3, Advanced Web Development, Databases, Discrete Math, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Switching and Automation Theory

#### **SKILLS**

Languages/Frameworks:Tools/Software:Operating Systems:Certifications:C++, C#, Python, JavaScript,Microsoft OfficemacOS, Unix, LinuxiOS Development,Node.js, React.js, Ember.js,Adobe Suite, GitWindowsBMCSQL, Perl, PHP, Go, Swift,Tableau, Alteryx

HTML, CSS, MATLAB

#### WORK EXPERIENCE

# GCTO CORE ENGINEERING INTERN, UBS

Weehawken, NJ - July - August 2020

- Apart of Big Bet 1 & 2 whose goal is to deliver engineering tech to "transform the bank". Aims to create a dynamic developer experience and a common services ecosystem.
- Contributed to the UBSCTL codebase (Go), which will allow developers to go from app creation to deployment only using this command line interface
- Participated in the UBS Intern Challenge by delivering a pitch and demo (**ReactJS**) in collaboration with other interns for a platform to manage the return of employees to the office post COVID-19 quarantine

## COMPUTER SCIENCE LAB TUTOR, CSI

Staten Island, NY - October - December 2019

- Successfully analyzed and debugged code (C++) written by students to help solve problems
- Assisted students in understanding the fundamentals of programming

## IB TECH GALM INTERN, UBS

Weehawken, NJ - June - August 2019

- Developed scripts utilizing **Perl** and **SQL** languages that automated report generation of trade data from the Martini report trading application
- Applied SonarQube static code analyzer to the Martini application codebase for review of existing vulnerabilities and bugs in order to improve technical integrity
- Winner of 2019 UBS Intern Challenge Created a pitch for possible future integration of existing legacy systems at UBS with Microsoft Azure services in collaboration with other Group Technology interns

#### SELECTED PROJECTS

## COVID-19-TRACKER (React.js & Express.js)

2020

- Full Stack Application using **React.js**, **Express.js** and **Google Firebase**, utilizing several APIs including Twilio, NumVerify and COVID-19 Statistics.
- ReactJS powered front-end application using MaterialUI and Charts.js to display various statistics regarding COVID-19 hosted on AWS Amplify
- Paired the webpage to an Express.JS powered back-end hosted on Heroku for allowing users to register for daily text messages with statistics

## IMAGE CLASSIFICATION RESEARCH PROJECT (Python)

2019

- Proposed and developed topologies for image recognition based on convolutional neural networks, along with building the learning strategies for these topologies.
- Evaluated the accuracy of classification (detection) results by using different approaches such as batch training, different activation and loss functions, augmentation, normalization, stand pooling and dropout.
- Performed experiments with medium and large size datasets, to plot and analyze the experimental results and make recommendations related to different applications and architectures.

### **AWARDS**

- Dean's List at the College of Staten Island (2018-2020)
- National Grid Scholarship for outstanding Academics (2018)

### **INTERESTS & ACTIVITIES**

- Lacrosse, Baseball, Basketball, Football, Snowboarding
- Proficient in Russian Language
- UBS Hackathon 2019
- CSI Computer Science Club
